RELIABLE SERVICE
24 hours a day, 7 days a week.
Service desk manned by experienced specialists.
Remote-service support.
On-line parts ordering.

PAIL-LINE PRODUCT COMBINATIONS

The Stork Pail-Line represents top quality in injection moulding machines for manufacturing containers and lids. In this special product line Stork translates our customers passion, craftsmanship, experience and requirements into dedicated solutions. Stork constantly listens to her customers, integrates the insights thus gained into her own expertise and ensures effective implementation in her products. This is a dynamic process. Stork is innovating continuously. It's the very reason why the Stork injection moulding machine will always be the best, fastest and most reliable for manufacturing containers and lids. Of course we apply the same philosophy to our other product lines.

Stork stands for maximum reliability resulting in maximum uptime. This entails supplying high quality injection moulding machines as well as impeccable services. Consequently Stork offers you the highest degree of service, allowing you, in turn, to offer your customers the guarantee of maximum delivery performance.

To Stork employees being service-oriented is in their DNA and we expect no less from our suppliers. As a result you as a customer are assured of optimum support chain-wide.

Each and every Stork employee is an ambassador for the craftsmanship we offer you. In our book, craftsmanship extends to the way we listen to customers, give advice, develop, manufacture and provide services. This unique brand of craftsmanship is the pride of everyone working at Stork. We're at your service, day in and day out.

AT STORK IT'S ALL ABOUT THE CUSTOMER

This publication has been compiled with the greatest possible care, but no rights may be derived from its contents.
CLAMPING-UNIT
FAST AND SMOOTH
- Robust 5-point toggle system guarantees fastest and smoothest movements.
- Reinforced linear rail guidance provides accurate durable mould guidance.
- Increased opening strokes for IML are available.
- Extremely stiff platens are used for symmetrical filing at minimum clamping-force.
- The extremely fast and precise mould security protects your valuable moulds.
- Progressive lubrication with active monitoring ensures high reliability and long life-time.
- Suitable for food-grade lubricants.
- Internal tie-bar clamping-force measurement increases process quality.

DRIVES
ACCURATE AND ENERGY EFFICIENT
- Parallel movements of all functions enables shortest cycle-times.
- Hybrid accumulator drive for fastest speeds and extremely short response times.
- Comes standard with Stork controlled energy-optimised variable pump.
- In-line high pressure filtration increases reliability.
- Frequency controlled main engine reduces energy consumption.
- Electrical clamping unit with robust rack and pinion drive and regenerative unit allows for shortest cycle-times at lowest energy consumption.
- Electric injection fine-tuned for thin-walled applications.

INJECTION-UNIT
HIGH OUTPUT AND HOMOGENEOUS MELT
- Special mixing screws up to and including 27 l/d deliver highest output and optimum dispersion of master-batch.
- Extremely fast injection and switch-over are ultimate conditions for quality in thin-walled injection moulding.
- The robust shut-off nozzle with large bore reduces pressure-drop.
- 2K-solutions in different arrangements are available for different applications.
- High circumferential speeds enable short plasticizing times and high output.

SC1301 SMART TOUCH
INTELLIGENT AND USER-FRIENDLY
- The IPC with 19"multi-touch screen presents all information in a clear and orderly fashion.
- Stork’s own software development provides us full control over process and optimisation.
- In-house software development guarantees short delivery-times in software changes.
- Proven user-friendly concept.
- Free programmable core-pulling and air-valve sequences are easy to program.
- Integrated hot-runner with graphical display and optional current monitoring, boost and follow-me function increases process quality and easy-operation.
- Remote service enables fast service intervention via our Stork help-desk.
- The ECO page allows for energy optimisation of the process.
The production of containers for the food-industry requires maximum hygiene. The Stork Pail-Line can also be lubricated with food-grade oil and lubricants.

Stork offers a wide choice in drive systems which enables us to offer you always the fastest and most energy efficient machine.

Thanks to enlarged opening-strokes, IML and take-out is possible in one movement which results in a shorter cycle-time.

Stork uses a robust toggle system. The toggle system guarantees the shortest dry-cycle time at the lowest energy consumption.

Ejecting containers requires a lot of air and perfect timing. The freely programmable high-flow air-valves with separate adjustment of flow and pressure guarantees the shortest demoulding times, resulting in the shortest cycle-times.

Pails are increasingly fitted with integrated handles. The 2K unit needed to facilitate this is available in different sizes and arrangements.

**Massive Steel Platens**
- Maximum stiffness
- Minimum cone

**Air Ejector**
- 2000 l/min
- Pressure and volume adjustable
- Free programmable
- Exact timing

**2K-Unit**
- Several arrangements
- Flexible in sequence
- Serial or parallel injection

**Injection Speeds**
- Fast acceleration
- Perfect control
- Accurate switch-over
- Electric and hydraulic

**In-house Software Development**
- Provides full control over process and optimisation.
- Guarantees short delivery-times in software changes.
- Proven user-friendly concept.
- Free programmable core-pulling and air-valve sequences are easy to program.
- Integrated hot-runner with graphical display and optional current monitoring, boost and follow-me function increases process quality and easy-operation.
- Remote service enables fast service intervention via our Stork help-desk.
- The ECO page allows for energy optimisation of the process.
